

Science Home Learning – Electricity

Lesson 2 - To present findings

By explaining how to stay safe with electricity

You may remember we have watched this video in class which explains how to stay safe with electricity. Watch it again to remind you:

[Electricity - KS2 Science - BBC Bitesize](https://www.bbc.co.uk/bitesize/clips/zqb7tyc) (https://www.bbc.co.uk/bitesize/clips/zqb7tyc)

I want you to imagine that an alien has arrived on Earth and doesn't know anything about the way electricity works. Can you create a comic strip to show how you would teach an alien to be safe when using electricity? You may like to use speech or thought bubbles to teach the alien to be safe. There is a template on the next page to help you make a comic strip or you could make it in your own way.

Some ideas could be the alien trying to stick something in a toaster, using electricity near water, getting tangled up in wires, going into the bathroom with an electrical appliance.

I can't wait to see your comic strips – don't forget to give your alien a good name!
