

L.I: To explain how to calculate perimeter.

by teaching others

Lets quickly work out the below question to remind ourselves of how to calculate perimeter:

Activate Windows

Using your knowledge of perimeter, we want you to be the teachers today!

Activate Windows
Go to Settings to activate Window

You have a choice of how you would like to teach perimeter today.

Firstly, you can write down your explanation and draw diagrams to support each step.

OR

Record yourself 'teaching' how to calculate the perimeter of a shape. Have a think about each step that you need to take and explain each one.

Activate Windows
Go to Settings to activate Windows.

Bronze challenge: Describing perimeter using squares or rectangles.

Silver challenge: Describing perimeter using a regular shape of your choice

Gold challenge: Describing perimeter using an irregular shape of your choice

Think about what shape you will use to explain the method in action. Also plan what you are going to say. You can then film yourselves 'teaching' your mini lesson or write down your explanation. Good luck!
